This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

OFFICE OF THE DIRECTOR OF
PUBLIC INSTRUCTION,
MADRAS, 16*th July* 1875.

No. 1,648.

From

EDMUND THOMPSON, ESQ., M.A.,
Acting Director of Public Instruction,
Madras,

To

THE HON. D. F. CARMICHAEL,
Acting Chief Secretary to Government,
Fort St. George.

SIR,

I HAVE the honour to submit the Report of the Principal of the Medical College for the Session 1874-75, with the usual Appendices.

2. COLLEGE STAFF.—The most important feature connected with the administration of the College is the retirement of Dr. George Smith from the Principalship, on his promotion to the rank of Deputy Surgeon-General, after having presided over the College for eleven years, his connexion with it as Professor having lasted still longer. The final severance of Dr. Urquhart's connexion with the College is also noticed by the Principal.

3. SENIOR DEPARTMENT.—The number on the rolls in the Senior Department is five, the same as it was last year, and it is greatly to be regretted that the advantages offered by the College do not attract a larger number of students. There were three candidates in July 1874 for the Preliminary Scientific Examination of the Madras University, and from the Report of the Syndicate it appears that two of them, Messrs. Simpson and Marsden, succeeded in passing. The three students of the first year are now undergoing the same trial. The success that attended two ex-students of the College, Messrs. O'Hara and Gray, in competing in England for the Indian Medical Service, affords additional testimony, if such were required, to the sound teaching and training that have for so many years distinguished this College.

4. SECOND DEPARTMENT.—The strength of this department falls slightly below what it was last year, when it contained twenty-eight students. There are now twenty-six, six being in the third, ten in the

Digitized by Google

second, and ten in the first year of College attendance. All the six young men in the Senior Class appeared before the Examination Committee, and all were reported qualified for the grade of Assistant Apothecary. Mr. Jones, a student of this class in the previous year, but who was prevented by illness from attending the examination, was permitted to present himself this time, and succeeded in passing. The students of the Second Class are reported upon favourably by the Professors, and are, with a single exception, pronounced intelligent and industrious. The Third Class also acquitted itself well, and the percentages of marks gained in the several subjects, with the exception, perhaps, of Chemistry, are most satisfactory. Throughout the department the conduct of the students appears to have been excellent.

5. JUNIOR DEPARTMENT.—The strength of this department was at first fifty-eight against sixty-one of last year, and at the close of the Session it numbered fifty-six, two students of the lower class having been dismissed for absence without leave. The Senior Class is favourably reported on by the Professors, and its general excellence is proved by the fact that all the twenty-eight students composing it were declared qualified for the grade of Hospital Assistant. The Junior Class gave satisfaction on the whole, and the number reported deficient is considerably smaller than it was last year. At the same time the insufficient knowledge of English possessed by these students is deplored in the present report as it has been in those of past years.

6. MEDALS.—The gold medal lately instituted in memory of Deputy Surgeon-General Blacklock, and intended as a reward for distinguished zeal and attention to clinical duties, was awarded to Hospital Apprentice G. Hindley, while the Johnstone Medal for general proficiency was carried off by D. Robertson. The Government Gold Medal for Native Medical Pupils only was won by Mahomed Salar.

7. PROFESSORS' REPORTS.—The only report specially noticed by the Principal is that from the Professor of Surgery, in which a modification of the present curriculum is proposed; but, though attaching weight to Surgeon-Major Cockerill's suggestions, the Principal considers it advisable to defer their consideration for the present, at all events till the return of Dr. Paul.

8. Towards the end of the report three topics of interest are touched upon—the admission of lady students, from whose future labours among the women of India so much good may confidently be expected; the institution of the new degree of Licentiate of Medicine and Surgery, which being somewhat less exacting than the present M.B. and C.M. Degree in its demands upon the time and previous education of students will, it is believed, attract a considerable number of candidates; and, lastly, the important scheme of Surgeon-General Balfour for

Digitized by Google

training Civil Medical Practitioners. Classes for this last purpose, and corresponding to those constituting the present Senior and Junior Departments, will be formed at the commencement of next Session.

I have the honour to be,
Sir,
Your most obedient servant,

EDMUND THOMPSON,
Acting Director of Public Instruction.

ANNUAL REPORT

OF THE

MADRAS MEDICAL COLLEGE,

SESSION 1874-75.

WITH the present Anniversary the academic year 1874-75 comes to an end.

2. The changes that have taken place in the staff of the institution since the close of last session are as follows.

Surgeon-Major G. Smith, M.D., the Principal of the College, retired from that post on promotion to the rank of Deputy Surgeon-General on the 20th October 1874, and was succeeded by Surgeon-Major M. C. Furnell, the Professor of Ophthalmology and Physiology. Consequent upon this change Surgeon Brockman, the Professor of Pathology, was nominated to act in the chair of Ophthalmology and Physiology, and Surgeon D. R. Thompson, M.D., was appointed to act as Professor of Pathology and Materia Medica; the latter officer assumed charge of his duties on the 13th November 1874. Messrs. Furnell and Brockman were subsequently confirmed in their respective appointments, the confirmation having effect from the 28th March 1875. Dr. Smith was connected with the College as Professor of Anatomy and Physiology and Secretary to the College Council from 13th December 1850 to 1st December 1854, and from the 24th February 1863 to the 24th October 1874 he held, at different times, the chairs of Midwifery and Diseases of Women and Children, Ophthalmology, Physiology, and Medicine, and from the 10th October 1863 up to the date of his relief the office of Principal of this College. He was thus associated with this institution for the long period of 15 years 7 months and 21 days.

I should be doing injustice to my own, and I am sure to the feelings of all the Professors past and present of the College who had the pleasure of serving with him, if I omitted to take this opportunity of expressing the great loss, we all feel, this College has sustained from the severance of Dr. Smith's connexion with it. A zealous, clearheaded, able man; he filled during a great number of years the post of Principal, and during this time the Madras Medical College gained a reputation for imparting a sound practical professional education second to none in India; nay, I may say, judging from the position the students of our College have taken in the competitive examination of Great Britain, not only for commissions, but prizes, second to none even in the British Empire. This is due, to use his own words, "to the graduated and prolonged curriculum of study, to the efficiency of the clinical

Digitized by Google

training and class examinations, to the care with which the channel of study has been marked out and buoyed, and to the military discipline which controls and energizes all:"—courses of study and discipline perfected by our late Principal after much experience and reflection, and we sincerely trust not likely to be rudely set aside from any vain desire of change.

Surgeon-Major King, the Professor of Chemistry, having been appointed Acting Sanitary Commissioner, Surgeon Macrae was nominated to act in the chair. This officer entered upon his duties on the 18th March 1875. Surgeon Thompson, the Professor of Materia Medica and Pathology, having been appointed Surgeon of the 1st District, relinquished charge of his College appointment to Surgeon Sibthorp on the 11th May 1875. Surgeon Sibthorp, who was at first appointed Acting Professor, has since been confirmed in this appointment.

Dr. Urquhart, the Professor of Medical Jurisprudence, resigned the chair on the 29th June 1874, and Honorary Surgeon R. Harvey was nominated, by Government, Professor of that subject on the 14th July 1874. Dr. Urquhart was connected with the College from January 1857 to June 1874. In the words of our late Principal: "During his prolonged connexion with the Madras Medical College, Dr. Urquhart has, by the conscientious discharge of his duties, by his ability as a teacher, and by his amiability and uprightness as a colleague, secured the confidence, respect, and good wishes for his future success of all connected with this institution."

Honorary Surgeon R. Wilkins, who proceeded to England on Medical Certificate on the 3rd May 1874, returned on the 10th December 1874, and relieved Mr. Wynne who was acting for him.

The subjoined table furnishes the information required to be given by Order of Government, No. 300, dated 17th October 1866.

4. Extracts from the Annual Reports.—The Professor of Surgery remarks alluding to the Junior Department—

"Mr. Hamilton considers the class generally a poor one, and that the Mysore lads compare unfavourably with the Native Medical Pupils. Mahomed Salar, a diligent student, stands at the top of the class and gains the first prize. Coopoosawmy, who has evinced good intelligence and risen to the second place, obtains the second prize.

"6. The course of lectures now concluded is supposed to embrace the principles and practice of Surgery, excepting only Minor and Operative Surgery, which are taken up in the Summer Session. The Winter Session terminating on the 30th of March, and the Summer Session commencing on the 1st of April, the Professor has to lecture continuously for nine months; but, inasmuch as all the students of the Winter Session do not attend the Summer course, an inconvenient amount of condensation has to be performed in the Winter lectures, and a somewhat similar expanding during the summer. Operative Surgery can only be taught when there is a subject, say on eight days during the three months. I think, therefore, in the present curriculum a greater importance is assigned to Minor Surgery than it deserves, and that a continuous course of nine months upon Surgery generally would be better for the class. This was the practice previous to the year 1864, and were I not merely a *locum tenens*, I would recommend a return to it."

There is a great deal in what Surgeon-Major Cockerill says with which I feel inclined to agree, but the curriculum, as it at present stands, was the result of a long consultation by a Committee appointed in 1864, and has been in use ever since, and, as the Professor of Surgery, Dr. Paul, is likely to return before long, I am loth at present to recommend any change. It will be a matter deserving attention at some future period.

The reports of the remaining Professors contain nothing requiring special notice.

Digitized by Google

5. Constitution of the Departments.

A.—*Senior Department.*

To this department belong students who are qualifying for University degrees. There are five at present on the rolls of the College, two in their second year of study, and three in their first year.

At the termination of the College Session last year, Messrs. Pope and Simpson, Government Scholars, and Mr. Marsden, a Lane Scholar, appeared for the Preliminary Scientific Examination of the Madras University, and in July this year Messrs. Thomas, Whitwell, and Burton, having completed their first course of study, will present themselves for the same examination. Mr. Pope resigned his scholarship and proceeded to Europe. He is now prosecuting his medical studies in the University of Edinburgh. Messrs. Simpson, Marsden, Thomas, Whitwell, and Burton have, by their conduct, industry, and attainments, secured the approval of their teachers. Mr. O'Hara, who left the College in May 1874, was successful at the competitive examination for the Indian Medical Service held at Burlington House in August last year, standing fourth in the list of fourteen candidates. At the same examination Mr. H. A. C. Gray, also a former student of the College and a graduate of the University of Edinburgh, competed, and was successful—results affording, if need were, additional testimony to the remarks made in last year's report by my predecessor as to the soundness of the education provided in this College.

B.—*Second Department.*

At the commencement of the session the Second Department consisted of six Hospital Apprentices in their third year of study, of ten Apprentices in their second, and of ten in their first year of College attendance.

No casualties have occurred in this department.

Senior Class.—The six young men composing this class appeared before the Final Examination Committee, and after a searching examination which lasted for four days the Committee reported that all were qualified for the grade of Assistant Apothecary. Mr. Jones, a former student of this department, who, from illness was prevented appearing before the Committee last year, was permitted to do so this year. He underwent the same examination as other students, and was pronounced qualified. These young men will receive from the Chairman this day their qualification certificates. Their conduct during the whole period of their connexion with the College has been uniformly good, and the success they have achieved is a strong proof of how diligently they have worked whilst at the College and at the hospitals.

Digitized by Google

Second Class.—At the Professors' examinations held at the close of the Winter and Summer Sessions, the students of this class acquitted themselves on the whole satisfactorily. The percentage of marks obtained in the several subjects in which they were examined is as follows.

Anatomy	90
Physiology	80
Surgery	60
Medicine	50
Minor Surgery...	100
Practical Pharmacy	100

With the exception of Hospital Apprentice Nursimooloo the students of this class have been reported as intelligent and industrious, and to have made good progress, particularly Bowers and Pemberton, who during the previous year also worked well and secured the approval of their teachers. All have been well behaved.

Third Class.—The youths of this class have just completed their first course. They appeared before the Committee of Professors at the close of the Winter and Summer Sessions, and were carefully examined in the subjects taught them during those Sessions. Results show that they acquitted themselves well. The percentage gained in the several subjects are given below.

In Anatomy	80
Chemistry	55
Materia Medica	95
Practical Chemistry	100
Do. Pharmacy	100

The young men in this division are industrious and painstaking, and well conducted besides. Tocher and Knox are very promising students.

C.—*Junior Department.*

On the 1st October 1874 the Junior Department consisted of twenty Native Medical and seven Mysore Pupils and one Private Student in their second year of study, and of twenty-six Native Pupils and four Mysore Students in their first year at College—total fifty-eight.

Senior Class.—Twenty Native Medical and seven Mysore Pupils and one Private Student appeared before the Final Examination Committee on the 19th instant, and were all reported qualified for the grade of Hospital Assistant. Favourable mention is made in the reports by the Professors of the conduct and industry of the students of this class.

Junior Class.—At the beginning of the session this class consisted of twenty-six Native Medical Pupils and four Mysore Students. During

Digitized by Google

the session one Native Medical Pupil (A. Mooroogasen, No. 1,105) was dismissed the service as a deserter, and one Mysore Student (T. G. Mooneesawmy) was discharged for long absence from College without permission.

The class examinations of the twenty-five Military and three Mysore Pupils give the following results.

In Anatomy the percentage of good marks is	96
Physiology	60
Materia Medica	89
Practical Pharmacy	82
Minor Surgery	100

The students of this class gave satisfaction to their teachers. The report of last year's Junior Class shows thirteen deficient, of which number, three were removed from the College as not likely to qualify for the public service. This year only eight are so recorded, and none considered so deficient as to lead the Council to recommend dismissal. Want of adequate knowledge of the English language still forms the bar to these students receiving the full benefit of the knowledge offered to them by the Professors of the respective classes.

GENERAL.

6. Medals.—The Government, in their Order No. 168, dated 31st May 1875, authorized the acceptance by this College of a gold medal designated "The Blacklock Medal." This decoration was presented by a number of subscribers to perpetuate the memory of the late Dr. Blacklock. It is presented to the student who distinguishes himself by his zeal and attention to the clinical duties in the Medical or Surgical Wards of the General Hospital. Dr. Blacklock was, at the time of his death, Deputy Surgeon-General of the Presidency Division, and for sixteen years prior to his attaining this position held the Professorship of Surgery, and subsequently of Medicine, at this College. Dr. G. Smith, on the occasion of that officer's retirement from the College, recorded the following well-deserved testimony. "Mr. Blacklock's connexion with the College has extended over sixteen years. He was the senior Professor. Thoughtful and original as a teacher and writer, kind and humane as a Physician, exercising his noble profession among the poor and wretched, urbane and obliging as a fellow labourer in the great work of education, few men have left a name in Madras more respected and esteemed than that of Ambrose Blacklock."

The thanks of the College Council are due to the donors of this medal, which, while it serves the purpose aimed at by the subscribers, will, there is no doubt, operate as a powerful incentive to the acquirement by our students of a knowledge of disease at the bed-side of the sick.

Digitized by Google

Hospital Apprentice G. Hindley, in the opinion of the College Council, is worthy of this distinction. The medal accordingly has been awarded to him.

JOHNSTONE MEDAL.—The Johnstone Gold Medal given for general proficiency has been awarded to Hospital Apprentice D. Robertson, a young man of whom, since his joining the College, the Professors have reported in terms of praise. He stands at the head of his class—a place which he held at the close of the two previous sessions. D. Robertson highly merits the distinction conferred upon him.

GOVERNMENT GOLD MEDAL.—The Government Gold Medal competed for by Native Medical Pupils only has been adjudged to Native Medical Pupil Mahomed Salar, a student of good ability and attainments.

7. ASSISTANTS.—The Assistants of the College, whose names appear in the margin, have devoted themselves with zeal and assiduity to their various duties, and the thanks of the Principal are particularly due to Honorary Surgeons Wilkins and Harvey for their valuable assistance.

Honorary Surgeon R. Wilkins, F.R.C.S.
Do. R. Harvey.
Mr. W. Karney.
Mr. W. Hamilton.
Mr. Cunnoosawmy Pillay.

The Clerk, Librarian, and Draughtsman have given satisfaction.

8. LIBRARY.—Eighty-three volumes have been added to the Library since last report, bringing up the total number of volumes to 4,814. A new catalogue of the Library has been prepared.

9. MUSEUM.—Thirty-four specimens have been added to the Museum. Surgeon Brockman who undertook the preparation of a catalogue of the specimens has completed the work, the printed copies of which are kept in the cases for reference. The thanks of the College are due to Surgeon Brockman for the labour he has bestowed on this most useful work.

10. SICKNESS.—Although a large number appear as having been on the sick list since last report, there has been no individual case of any severity and no casualty.

11. *Text-Books.*—The list of the sanctioned text-books in use with the several departments is appended to this report.

The difficulty hitherto experienced in supplying suitable books for the Students of the Junior Department of the College has been overcome by the Government undertaking the supply at published prices, to be paid by small monthly instalments. The arrangement takes effect from the commencement of next session.

Government, in their Order No. 6, of the 11th January 1875, sanctioned the admission of Lady Students into the Medical College to qualify either for the degrees of the Madras University, or for a certificate of qualification to be granted at this College. Ladies entering with a view to graduation being required to fulfil all the conditions required of University students, and those choosing the College qualification to

Digitized by Google

subject themselves to a training at College and at the hospitals for a period of three years, the first of which to be pre-collegiate, and the other two "academic," with clinical instruction at the hospitals.

The proposal to institute the degree of Licentiate of Medicine and Surgery has recently been passed by the Faculty of Medicine of the Madras University, and will shortly come before the Senate; the degree will correspond with that of the Calcutta and Bombay Universities. Young men desirous of qualifying for the L.M. degree will have to undergo a course of professional training at a recognized School of Medicine to extend over a period of four years, or one year training at a hospital or dispensary, and three years at a Medical School.

From next Session classes, corresponding to those constituting our present Second and Junior Departments are to be instructed at this College. The youths will receive the same instruction as is now imparted to Military Students, and, on being declared qualified, they will join the Civil Subordinate Medical Department for employment under Municipalities.

The Principal tenders his cordial thanks to his colleagues who have smoothed his first Session's tenure of office by their kindly and cheerful co-operation.

MADRAS MEDICAL COLLEGE,
28*th June* 1875.

M. C. FURNELL, F.R.C.S.,
Principal.

Report on the Final Examination of Students of the Second and Junior Departments of the Medical College.

PRESIDENT:

W. J. VANSOMEREN, M.D., *Deputy Surgeon-General.*

MEMBERS:

J. M. JOSEPH, M.D.
W. MACRAE, A.M., M.B.

The Committee were engaged in examining the several candidates of the Second and Junior Departments from the 16th to the 19th June inclusive; a Medical Pupil, Mahomed Salar, sick on all those days, was examined subsequently on the 23rd June.

2. The appended tabular forms show the results of the examination. In both departments all have passed, but the recommendation that G. Jones should pass demands some explanation: his marks amount to 59, one beyond the limiting number for passing; but, looking to the excellent place he took in Operative Surgery, his good examination in the written examination in Medicine, and the fact that he was unable from illness to appear at the last final examination, and has been

Digitized by Google

obliged to support himself in a non-professional employment during the intervening year, where he could scarcely keep himself up to the requisite amount of book knowledge, the Committee consider it will be scarcely right to allow a solitary unit to stand in his way.

3. In conclusion, the Committee beg to record their belief that the Medical College is maintaining its high character for the thorough education of its *alumni*.

(Signed)	W. J. VANSOMEREN, M.D., *Deputy Surgeon-General,*	President.

No. 1.

Report on the Class of Medicine, Session 1874-75.

The class met 111 times; seventy-four lectures were delivered.

2. Thirty-seven examinations, oral and written, were held, including the "Conversational course;" the proportion of examinations to meetings was one in three.

3. Models and pathological preparations from the Museum and plates were used to illustrate the lectures, and, as often as available, fresh specimens were brought from the General Hospital and shown to the students, so as to give them opportunities of becoming practically familiar with morbid anatomy.

4. Both classes consisted in all of sixteen Second Department Students, the Senior Class being composed of six Hospital Apprentices in their third year of study, and the Junior of ten Hospital Apprentices in their second year. No Senior Department Students attended either class.

Senior Class.—All the young men of this class are more or less intelligent, and no one is conspicuous for want of application. Robertson and Morton generally acquitted themselves best at the oral, while Hindley excelled at the written examinations. The attainments of Butler and Nicholas are creditable. Smith was not so careful in his answering as the others. Robertson has won the prize. Morton merits high approval.

Junior Class.—Pemberton and Bowers, two young men of marked intelligence and industry, head the list; their attainments are very nearly equal. King, Delaney, and D'Vaz are painstaking, and display a fair amount of knowledge of the subject; the remaining five are less intelligent, and their attainments are not so good. Pemberton is highest in marks and obtains the prize. The conduct of both classes throughout the session has been good.

Junior Department.—Consists of twenty-eight students, *viz.*, twenty Native Medical Pupils, seven Mysore Students, and one Private Student from Poodoocottah; all in their second year of study.

This class attended my lectures, and was also taught separately by Mr. Karney, under whom eighty-nine meetings and thirty-five examinations were held. He remarks that many of the youths of this class, besides knowing very little of English, are mentally very dull; their acquirements in Medicine, therefore, do not embrace more than a meagre knowledge of the prominent facts connected with the subject, and compared with the class of the preceding year, the progress and attainments of this one are, he considers, less satisfactory. The Mysore Students, with one or two exceptions, are among the most backward

Digitized by Google

of all. Soobramanien and Peter (the latter is a Mysore Student) are entitled to prizes. The conduct of all the pupils has been good.

No. 2.

Report on the Class of Surgery, Winter Session 1874-75.

The class met 110 times. Seventy-seven lectures were given and thirty-three examinations held, the proportion of examinations to the number of meetings being 1 in 3⅓.

2. The class was composed as follows.

SENIOR DIVISION, SECOND DEPARTMENT.

Six Hospital Apprentices in their second course of Surgery and third and last year at College.

JUNIOR DIVISION, SENIOR AND SECOND DEPARTMENTS.

One Government Student, one Lane Scholar, and ten Hospital Apprentices; all in their first course of Surgery and second year at College.

SENIOR DIVISION, JUNIOR DEPARTMENT.

Twenty Native Medical Pupils, seven Mysore Students, and one Private Student from the Poodoocottah Government—Grand Total 46.

3. *Senior Department Students.*—There have been only two students of this department, and both are in their second year. They are both intelligent young men, and have made good progress and conducted themselves satisfactorily. Mr. Simpson especially deserves commendation for his zeal and earnestness.

4. *Second Department Students.*—Sixteen—six in their last year at College, ten in their second. Of the Senior Class, Robertson far outstrips the rest. He gains the prize, and is, in my opinion, in knowledge perfectly qualified to practise as a Surgeon. Butler and Smith are attentive and well informed. I think the whole class will pass in Surgery.

Of the juniors, Pemberton stands first and takes the prize, Bowers second, both being above the two students of the Senior Department. King, Delaney, and Weston have also done very well. Verghese and Nailer are careful but slow. Nursimooloo has been last in the class the whole session.

5. *Junior Department.*—These lads, twenty-eight in number, in addition to attending my lectures have been carefully instructed by Mr. Hamilton, by whom they have been examined thirty-one times. With few exceptions they are too deficient in intellect and general knowledge to enter upon the study of an abstruse subject with advantage.

Mr. Hamilton considers the class generally a poor one, and that the Mysore lads compare unfavourably with the Native Medical Pupils. Mahomed Salar, a diligent student, stands at the top of the class and

Digitized by Google

gains the first prize. Coopoosawmy, who has evinced good intelligence and risen to the second place, obtains the second prize.

6. The course of lectures now concluded is supposed to embrace the principles and practice of Surgery, excepting only Minor and Operative Surgery which are taken up in the Summer Session. The Winter Session terminating on the 30th of March, and the Summer beginning on the 1st of April, the Professor has to lecture continuously for nine months; but inasmuch as all the students of the Winter Session do not attend the Summer Course an inconvenient amount of condensation has to be performed in the Winter lectures, and a somewhat similar expanding during the Summer. Operative Surgery can only be taught when there is a subject—say on eight days during the three months. I think, therefore, in the present curriculum a greater importance is assigned to Minor Surgery than it deserves; and that a continuous course of nine months upon Surgery generally would be better for the class. This was the practice previous to the year 1864, and were I not merely a *locum tenens* I would recommend a return to it.

R. W. COCKERILL,
Ag. Professor of Surgery, &c.

No. 3.

Report on the Class of Operative and Minor Surgery, Summer Session 1874-75.

The class assembled fifty-one times; it was composed as follows:—

Hospital Apprentices, 3rd year 6
Do. 2nd ,, ... 10 only.

The lads in the last year were instructed in Practical Operative Surgery. Six bodies were brought, but only three of these were in a fit state for use; this number is altogether insufficient for instruction, and I cannot understand why subjects for dissection are so plentiful in the Winter Session, while subjects for Operative Surgery are so scarce in Summer. Both the senior and junior students were instructed in the application of bandages and splints.

Junior Department.—The class, consisting of twenty-eight students, met twenty-one times under Mr. Hamilton.

The lads were instructed in bandaging and in the application of splints, together with other practical points in Minor Surgery.

No prize is given for Operative or Minor Surgery, but I recommend Hospital Apprentice A. F. Smith for the prize for Clinical Surgery. Mr. Cunnoosawmy performed his duties to my entire satisfaction.

R. W. COCKERILL, Surgeon-Major.

MADRAS, MEDICAL COLLEGE,

No. 4.

Report on the Class of Midwifery, Winter Session 1874-75.

1. The class met eighty-six times: fifty-nine meetings were devoted to lectures, and twenty-seven, including the conversational course, to examinations, of which seven were written. The proportion of examinations to lectures was one to two and one-sixth.

2. There were no special arrangements for tuition.

3. The class was composed of six Military Students of the Second Department and twenty-eight Junior Department Students.

4. *Senior Department Students.*—None.

5. *Second Department.*—Six students in their third year of study. The class, though not a brilliant one, is above the average, and, on the whole, has made very satisfactory progress. The conduct of the class has been uniformly good. Robertson, Smith, and Hindley have all worked well; and in the matter of marks at the close of the Session were so nearly on a par, that I gave them a written test examination to decide their respective claims to the prize. It was won by Robertson, and the other two merit High Approval. The remainder of the class has done fairly well.

6. *Junior Department.*—Twenty-eight students. They attended the Professor's course of lectures on Midwifery, and were also present at the examinations, but without taking part in them.

The instruction of this class devolved on Mr. Hamilton, who reports of it as follows.

"The class met eighty-one times. Of these meetings, thirty-eight were devoted to examinations.

"The class consisted of twenty Military, seven Mysore, and one Private Student from Poodoocottah.

"About one-half of the lads have acquired a fair knowledge of the subject; the attainments of the remaining portion are more or less indifferent. Two of the Mysore Students, Peter and Veerabudra Pillay, have done well; the rest, although industrious, are wanting in ability and are deficient in English, being in this respect inferior to the Military Students.

"Private Student Chocalingum has not worked satisfactorily."

Mr. Hamilton, who has instructed the students of the Junior Department since the formation of the class in 1870, is a careful and painstaking teacher, and has given me every satisfaction.

7. *Clinical instruction.*—The students all attend at the Lying-in Hospital in rotation at night for the purpose of learning Practical Midwifery. They conduct cases of labor under the immediate supervision of the Pupil Midwife on duty, and on alternate days receive clinical instruction in the wards and work as Clinical Clerks.

Digitized by Google

When opportunity offers they are shown the various obstetric operations, and thus they are instructed in the management of both natural and morbid labor and in the treatment of puerperal diseases.

No. 5.

Report on the Class of Diseases of Women and Children, Summer Session 1875.

1. The class met forty-one times. The number of lectures was twenty-seven, and of examinations fourteen, of which two were written.

2. No special arrangements for tuition exist.

3. The class consisted of six students of the Second Department in their third year of study.

4. *Senior Department.*—None.

5. *Second Department.*—Six students. The conduct of the class has been good. The students have all done fairly well ; but towards the end of the Session their attention is diverted, to some extent, from the work in hand, by the necessity of working up for the final examina-

Digitized by Google

tion, the other subjects which they had studied previously. Smith, a painstaking student, though rather slow, carries off the prize. Morton and Hindley, equal, merit Approval.

6. *Junior Department.*—None.

7. Clinical instruction in Diseases of Women is given at the Lying-in Hospital during the morning visit. Owing to the smallness of the class, only one student at a time has been detailed for duty there for a period of two months. On alternate mornings, when he had not been on night duty in the labor ward, every opportunity was taken of rendering the clinical practice available for his instruction both in the wards and in the out-patients' room; and, when the students are limited to one or two, the patients do not make the same objection to their presence as they would do if there were a greater number. The difficulty which used to exist in the clinical teaching at the Lying-in Hospital is, I think, in a fair way of being removed. Subjects for clinical instruction in diseases of children are rarely available, but it is hoped that the children's ward in the General Hospital, when it is transferred from the Vepery Hospital, will be placed under the charge of the Professor of Midwifery, &c.

16*th June* 1875.

No. 6.

Annual Report on the Class of Ophthalmic Medicine, Session 1874-75.

1. There have been forty-five meetings of the class on Ophthalmology during the past Session. Of this number, fourteen were devoted to examinations.

2. The examinations consisted of "written" papers, of which there were five, and of "oral" examinations. The proportion of examinations to lectures is as one in three and a quarter.

Digitized by Google

4. The class consisted of six students of the Second Department. The general intelligence, industry, ability, progress, and conduct of these lads have given me entire satisfaction.

8. The course of lectures was begun by Surgeon-Major M. C. Furnell, who, on assuming the Principalship of the College, handed over to me his classes on Ophthalmic Surgery and Physiology. No special method of instruction was adopted. All practical work and the details of practice were carried on at the Eye Infirmary where operations were witnessed and instruction in the various methods of examination and treatment of diseases of the eye was afforded.

9. The following lads deserve mention.

Prize.—D. Robertson.

High Approval.—R. Butler.

11. Second-class Hospital Assistant T. Cunnoosawmy has at all times been most attentive, and has rendered efficient assistance.

E. F. BROCKMAN,

1*st April* 1875. *Professor of Ophthalmology.*

No. 7.

Report on the Class of Materia Medica for the Session 1874-75.

The class met 109 times during the Session; of these meetings, seventy-two were devoted to lectures.

The number of examinations, including the conversational course, was thirty-seven; the ratio of examinations to lectures has been one to two.

The class was composed of two Senior Department Students—Mr. Simpson, Government Scholar, and Mr. Marsden, a Lane Scholar, both in their second year of study; ten Military Students of the Second Department; and thirty lads of the Junior Department in their first year of study.

The lectures were conducted and illustrated as hitherto.

The attainments of the class, on the whole, are satisfactory; all have obtained over half the number of marks.

Tocher having obtained the highest number of marks is entitled to the prize.

Simpson and Marsden of the Senior Department are both intelligent students, and could, in my opinion, have shown better results at the examinations if they had been more industrious.

The general conduct of the class has been very good.

The class also met fifty-seven times under Mr. Hamilton, and was examined by him on the subjects taught by the Professor, and were

Digitized by Google

instructed practically in the characters of the various articles of the Pharmacopœia.

The results of his examinations are given in a separate column in the tabular statement.

Mr. Hamilton has been very zealous, and has given me efficient assistance.

Prosector King was attentive to his duties.

The lads of the Junior Department attended my lectures, and were also instructed by Mr. Cunnoosawmy Pillay, under whom they met 111 times, including forty examinations. The class consisted of twenty-six Native Medical Pupils and four Mysore Students, making a total of thirty in all; of the former, one has deserted. The conduct of the lads has been good, and their industry and intelligence is reported to be better than that of the class which preceded the one under report. I examined them twelve times, and I am satisfied that they have made very fair progress.

Mr. Cunnoosawmy Pillay has been most painstaking in working up the class.

MADRAS, MEDICAL COLLEGE,

Professor of Materia Medica.

No. 8.

Annual Report on the Classes of Practical Pharmacy, Session 1874-75.

Senior Department.—This class consisted of five Senior Department Students, two in their second year and three in their first year of study; twenty Second Department Students, ten in their second and ten in their first year of study.

The class assembled twenty-one times, each meeting being of two hours' duration.

The students were instructed in the compounding and dispensing of medicines. The preparations of the British Pharmacopœia were gone through as far as was practicable. Formulæ furnished by the General Hospital, the Eye Infirmary, and the Lying-in Hospital were made up. The students appear to be very well acquainted with practical dispensing, and they have performed their work on the whole with neatness and accuracy.

Digitized by Google

They were all trained in the reading and writing of prescriptions and in the filling in of the doses of extemporaneous formulæ, including the application of these in the treatment of disease.

The general conduct of the students was good.

The following students deserve marks of approval.

SENIOR DEPARTMENT.

J. C. Marsden. | D. Simpson.

SECOND DEPARTMENT.

Second year.

R. Pemberton. | C. C. D'Vaz.

SECOND DEPARTMENT.

First year.

R. T. Tocher.
E. T. Baptist. | C. R. Carroll.

Mr. Hamilton has rendered every assistance in the management of the class, and to him my thanks are due for the way in which he helped me.

Junior Department.—The Junior Department lads were taught by Native Assistant Cunnoosawmy Pillay. The class was composed of twenty-five Native Medical Pupils and four Mysore Students; of the latter one absconded.

Twenty-one meetings were held.

The conduct and progress of these lads are reported on favorably.

The following lads deserve marks of distinction:—

High Approval.

V. Veerasawmy Naidu, No. 1,072. | M. Serathiputtu Pillai, No. 1,060.

Approval.

17*th June* 1875.

Digitized by Google

No. 9.

Annual Report on the Class of Physiology, Session 1874-75.

1. The class met eighty-nine times during the past Session, of which sixty-one were lectures.

2. The number of examinations, both written and *vivâ voce*, was twenty-eight, inclusive of the "*Conversational course.*"

3. No special arrangements were made for the tuition of the class. Demonstrations were made by means of diagrams, &c., as far as was possible.

4. The class comprised two Senior Students in their second year of study, *viz.*, D. Simpson, Government Scholar, and J. C. Marsden, Lane Scholar; also ten pupils of the Second Department also in their second year of study.

5. Senior Department Students were two in number in their second year of study. I have been pleased with their intelligence and conduct during the past Session, but I regret to say that their industry, ability, and progress have not afforded me satisfaction. The previous superior pre-collegiate education of the students of this department naturally leads one to look for better results than can be attained by the pupils of the Second Department, and the disappointment is great, when, as in the instance of this class, the latter surpass the former in these attainments.

6. Second Department Students numbered ten. I have been pleased with the industry, progress, and conduct of these lads. One, however, M. Nursimaloo, has not shown himself so apt and diligent as his associates. This is to be ascribed, I think, to the defective preliminary training of this student, and not so much to his want of industry. He has worked, but, withal, he fails to grasp even, comparatively speaking, easy subjects. No Junior Department lads joined this class.

9. The prize has been deservedly won by R. Pemberton who possesses good abilities and an aptness to learn. M. Bowers is deserving of "High Approval," having gained four places in the class. To J. W. Delaney and G. R. Allan I adjudge "Approval," and especially to the latter. I regret once again to refer to M. Nursimaloo, whom I think deficient in general intelligence as well as in ability; and, taking into consideration that he has failed in obtaining one-half of the total number of marks attainable, I fear that he will not hereafter prove so valuable a subordinate in the service as is desirable.

No. 10.

Report on Class in Chemistry, Winter Session 1874-75.*

Sixty-five lectures were delivered during the Session, and forty-six examinations held, of which three were written.

The Assistant lectured to the class thirty times and held nineteen examinations.

The class consisted of three Senior Department and ten Second Department Students. All the pupils were well conducted and seemed anxious to learn. On the whole, the class is a good one. Some of the pupils are slow, but I do not consider any deserving of being noted as "deficient" in industry or attainments.

The maximum number of marks attainable was 492. Whitwell's marks were 372¼, and the prize falls to him. Tocher (of the Second Department) comes next (315½), and merits High Approval. The following deserve Approval:—

Peacock	293
Rodrigues	275¾
Burton	270
Kelly	265
Baptist	262
Thomas	260¼
Eyles	246

W. MACRAE,
Acting Professor of Chemistry.

No. 11.

Report on Class of Practical Chemistry, Summer Session 1875.

The class met thirty times for two hours, being mostly employed in the Laboratory.

It consisted of three senior students and ten of the Second Department, all in their first year.

They worked very well, and taken, as a whole, they were a very good class.

Whitwell, a senior student, did best, and is entitled to a prize. Thomas and Burton of the Senior Department, and Peacock, Carroll, and Knox of the Second Department are deserving of approval.

No. 12.

Report on the Class of Anatomy, Session 1874-75.

The Senior Class met 111 times. Seventy-four lectures were delivered.

2. Thirty-three oral and four written examinations were held.

3. There were no special arrangements for tuition.

4. The class was composed as follows.

—	Senior Department.	Second Department.
First-year Students...	3	10
Second-year Students	2	10

5. *Senior Department Students.*—Of the five students under this head, Simpson and Marsden were in their second year. Their conduct was good, but neither has displayed much ability or industry.

Those in their first year of study were Whitwell, Thomas, and Burton. These are well conducted, intelligent, and industrious lads; Whitwell is easily first among the whole of the first-year students; Thomas has acquitted himself well, and Burton very creditably.

6. *Second Department Students.*—Of these ten were in their first and ten in their second year of study; among the latter Bowers carries off the prize; Pemberton, Delaney, and King are worthy of approval; D'Vaz has done well; Nailer, Weston, and Allan fairly; and Verghese and Nursimooloo creditably; all are industrious, well-conducted lads.

Of the Hospital Apprentices in their first year of study, Knox has answered very well indeed (though not so well as first-year Student Whitwell of the Senior Department), and is strongly recommended for a prize; Tocher's answering is worthy of high approval; Peacock, Carroll, Baptist, Kelly, Gaudoin, and Rodrigues have done well; and Eyles and Payne creditably; the attendance of all has been regular, and their conduct good.

7. *Junior Department Students.*—Twenty-six Native Medical Pupils and four Mysore Students formed this class; one Native Medical Pupil deserted, leaving a total of twenty-nine students at the end of the Session.

The general conduct of the class has been good; Mr. Karney has taken great pains with them with only partial success. Eight are reported deficient, mainly through want of industry, but partly no doubt through their defective knowledge of English. The class met eighty-six times under Mr. Karney, and thirty-five examinations were held. I examined the class thirteen times also.

Digitized by Google

8. Thirty-six subjects were received for dissection during the Session. The students of this class worked well. Mr. Wynne acted as Demonstrator of Anatomy till the return from leave on 11th December of Honorary Surgeon Wilkins, and gave great satisfaction.

9. The following is a list of students entitled to prizes and to marks of High Approval and of Approval.

SENIOR DEPARTMENT.

SENIOR CLASS.

Prize.	*Approval.*
R. R. Whitwell.	J. Thomas.

SECOND DEPARTMENT.

SECOND-YEAR STUDENTS.

Prize.

M. Bowers.

10. The following is a list of students of the Junior Class marked deficient by my Assistant Mr. Karney.

N. Chinniah Pillay, No. 1,057.
M. Ruthun Sing, No. 1,081.
V. Ghouse Sherriff, No. 1,100.
Nayagum Michael, No. 1,103.
V. Ruthnavaloo Moodelly, No. 1,102.
P. Richards, No. 1,101.
V. Soondra Moodelly, No. 1,092.
S. Moonesawmy Naidu, Mysore Student.

11. Assistants and Prosector have given great satisfaction.

A. PORTER, M.D., F.R.C.S., M.R.T.A.,
Acting Professor of Anatomy.

MADRAS, MEDICAL COLLEGE,
April 1875.

No. 13.

Report on the Class of Hygiene, Summer Session 1875.

There were thirty-nine lectures delivered during the Session.

The Senior Class was examined twelve times, including three written ones. The Junior Class was examined nine times, three of these examinations being written.

Mr. Karney lectured to the Junior Class nineteen times, and gave them thirteen oral examinations. There were no Senior Department Students. Those of the Second Department numbered six. The Junior Class consisted of twenty Native Medical Pupils, seven Mysore Students, and one Poodoocottah Student. The students of the Second Department did fairly well during the Session. The Junior Class was a bad one. Their knowledge of Physiology was bad to begin with, and consequently they could not master Hygiene which mainly depends on Physiology. This is the third year I have had to teach Hygiene, and the Junior Class this year was decidedly poorer than those of the two previous years.

In the Second Department Butler is entitled to a prize, Robertson to High Approval, and Hindley to Approval.

In the Junior Class M. Coopoosawmy Naidu deserves the first prize, N. Apparow Moodelly the second prize, T. Veerabudra Pillay and P. Govindrajoo are entitled to High Approval, and Mahomed Salar and

D. M. Job to Approval. Mootoosawmy Pillay, J. Joseph, A. R. Ponnusawmy, A. Mariapillay, Mirzar Fareed Beg, and A. Chocalingum Pillay are marked deficient.

MADRAS MEDICAL COLLEGE,
15*th June* 1875.

W. MACRAE,
Lecturer on Hygiene.

No. 14.

Report on Class of Medical Jurisprudence, Summer Session 1874-75.

The number of meetings held was fifty-one. Of these thirty-four were devoted to lectures, the remaining seventeen to examinations.

The class consisted of six Hospital Apprentices, all in their third year of study.

The conduct of the class was very good. The young men have been diligent and industrious, have progressed satisfactorily, and possess a very fair amount of knowledge of the subject.

Hospital Apprentice Hindley having secured the highest number of marks is entitled to the *prize*. Apprentices Smith and Robertson holding respectively the second and third places in the class, merit "High Approval."

Mr. Cunnoosawmy Pillay, the Native Assistant, rendered every assistance, and did his work to my entire satisfaction.

MEDICAL COLLEGE, MADRAS,
16*th June* 1875.

R. HARVEY,
Professor of Medical Jurisprudence.

No. 15.

Report on Class of Botany, Summer Session 1874-75.

The class met forty-eight times.

The number of lectures delivered was thirty-two, the examinations held sixteen.

Three Government Scholars of the Senior Department, *viz.*, Messrs. Whitwell, Thomas, and Burton, all in their first year of study, constituted the regular class, and, by the permission of the Principal, Hospital Apprentices Pemberton, Bowers, and Delaney, in their second year of study, attended the lectures as well.

In intelligence and ability to comprehend the subject Mr. Whitwell is much in advance of Messrs. Thomas and Burton. All, however, have been industrious, and their conduct very good.

Mr. Whitwell has secured the highest number of marks, and is entitled to the *prize;* Messrs. Thomas and Burton to mark of "Approval."

Digitized by Google

Every opportunity was taken to illustrate the lectures by such fresh specimens as were obtainable, together with the dried ones in the Botanical Museum, as well as the valuable collection of drawings and diagrams of the College.

MEDICAL COLLEGE, MADRAS,

No. 10.

List of Students who have been brought to the notice of the Principal for "High Approval" and "Approval."

SENIOR, SECOND, AND JUNIOR DEPARTMENTS.

IN ANATOMY.

High Approval.

R. T. Tocher. | V. R. Cathervaloo, M. S.

Approval.

J. Thomas.
R. Pemberton.
J. W. Delaney.
H. W. G. King.
C. Rozario.

IN PHYSIOLOGY.

High Approval.

M. Bowers.

Approval.

J. W. Delaney.
G. R. Allan.
V. Veerasawmy Naidu, No. 1,072.
D. Appavoo, No. 1,091.
G. Francis, No. 1,117.
Y. Chinasawmy Pillai, No. 1,093.

IN MATERIA MEDICA.

High Approval.

A. R. G. Rodrigues.
E. Knox.
V. Veerasawmy Naidu, No. 1,072.
M. Chinniah Pillai, No. 1,057.

Approval.

E. J. Baptist. | V. Vijiaragavaloo, No. 1,107.

IN PRACTICAL PHARMACY.

High Approval.

V. Veerasawmy Naidu, No. 1,072. | M. Senathipathy Pillai, No. 1,060.

Approval.

D. Simpson.
J. C. Marsden.
R. Pemberton.
C. C. D'Vaz.
R. T. Tocher.
E. J. Baptist.
C. R. Carroll.
A. Samuel, No. 1,064.
C. Narrainasawmy, No. 1,108.
V. R. Vencatachellum.

IN MEDICINE.

High Approval.

R. H. Morton.
M. Bowers.
Mahomed Salar, No. 1,079.

P. T. Colundasawmy Pillai, No. 1,058.
M. Coopoosawmy Naidu, No. 1,073.

Approval.

R. Butler.
H. W. G. King.

N. Apparow Mudali, No. 1,087.
T. Veerabudra Pillai, M. S.

IN SURGERY.

High Approval.

R. Butler.

M. Bowers.

Approval.

D. Simpson.
N. Apparow Mudali, No. 1,087.

Syed Mohideen, No. 1,055.
V. Veerabudra Pillai, M. S.

IN MIDWIFERY.

High Approval.

A. F. Smith.
G. Hindley.
Mahomed Salar, No. 1,079.

P. T. Colundasawmy, No. 1,068.
Veerabudra Pillai, M. S.

Approval.

A. M. Lazarus, No. 1,061.

M. Coopoosawmy Naidu, No. 1,073.

IN HYGIENE.

High Approval.

D. Robertson.
Veerabudra Pillai, M. S.

Govindoorajoo, No. 1,075.

Approval.

G. Hindley.
D. M. Job, No. 1,088.

Mahomed Salar, No. 1,079.

SENIOR AND SECOND DEPARTMENTS.

IN CHEMISTRY.

High Approval.

R. T. Tocher.

AWARD OF PRIZES.

The following students are recommended for prizes, having secured the highest places in Register of Merit.

Senior Department.

Government Student R. R. Whitwell.—A prize for attainments in Anatomy, a second for attainments in Chemistry, a third for attainments in Practical Chemistry, and a fourth for attainments in Botany.

Digitized by Google

Second Department.

First-class Student D. Robertson.—A prize for attainments in Medicine, a second for attainments in Surgery, a third for attainments in Midwifery, and a fourth for attainments in Ophthalmology.

First-class Student A. F. Smith.—A prize for attainments in Clinical Surgery, and a second for attainments in Diseases of Women and Children.

First-class Student G. Hindley.—A prize for attainments in Medical Jurisprudence.

First-class Student R. Butler.—A prize for attainments in Hygiene.

Second-class Student M. Bowers.—A prize for attainments in Anatomy.

Second-class Student R. Pemberton.—A prize for attainments in Physiology, a second for attainments in Medicine, and a third for attainments in Surgery.

Third-class Student R. T. Tocher.—A prize for attainments in Materia Medica.

Third-class Student E. Knox.—A prize for attainments in Anatomy.

Junior Department.

First-class Student Mahomed Salar.—A prize for attainments in Surgery.

First-class Student X. Peter.—A prize for attainments in Medicine, and a second for attainments in Midwifery.

First-class Student S. Soobramonyen.—A prize for attainments in Medicine, and a second for attainments in Midwifery.

First-class Student M. Coopoosawmy Naidu.—A prize for attainments in Surgery, and a second for attainments in Hygiene.

First-class Student N. Apparow Mudali.—A prize for attainments in Hygiene.

Second-class Student S. Senathipathy Pillai.—A prize for attainments in Materia Medica, a second for attainments in Physiology, and a third for attainments in Anatomy.

Second-class Student R. Venkatachella Naidu.—A prize for attainments in Anatomy, and a second for attainments in Physiology.

Second-class Student A. Samuel.—A prize for attainments in Materia Medica.

Second-class Student C. Narrainsawmy.—A prize for attainments in Anatomy.

No. 17.

LIST OF CONTRIBUTIONS TO THE MUSEUM OF THE MADRAS MEDICAL COLLEGE—SESSION 1874-75.

DR. G. SMITH.

Liver with an abscess which had opened into the stomach.

M. C. FURNELL, ESQ., F.R.C.S., PHYSICIAN, GENERAL HOSPITAL.

A knuckle of intestine which had been constricted at the internal abdominal ring.

Small and large bowels extensively ulcerated.

Brain showing softening.

Embolic abscess in spleen.

Digitized by Google

Aneurism of the arch of aorta.
Malformed fœtus.
Small and large intestines ulcerated.
Fatty liver.

W. H. Harris, Esq., M.D.

Human ovum.
Cyst of broad ligament of uterus.
Uterus with a fibroid tumour.
Longitudinal hypertrophy of cervix uteri.
Human fœtus twenty-four weeks' old.
Uterus ruptured.
Ovarian cyst.
Horse-shoe kidney.
Uterus with an adherent placenta *in situ*.
Human ovum expelled in the third month of pregnancy.

R. W. Cockerill, Esq.

Bladder ruptured.
Epithelial cancer.
A large fibrous tumour.
Portion of large bowel gangrenous.
Compound comminuted fracture of bones of the leg.
Fracture of the orbital plate of the frontal bone.

E. F. Brockman, Esq.

Stomach showing the results of poisoning by arsenic.
Portion of base of the skull fractured.

Dr. Oswald.

A vesical calculus.
Kidneys of a lad from whom a stone in bladder had been removed.
Tumour removed from uterus.

Dr. Colvin Smith.

Clitoris hypertrophied.

Dr. J. F. Fitzpatrick.

Hard exostosis of superior maxillary bone.

R. Wilkins, Esq., F.R.C.S. (Edin.)

Brain showing a tumour.
Skull showing arrest of development.

No. 21.

List of the authorized Text-Books.

SENIOR AND SECOND DEPARTMENTS.

Anatomy.—Wilson's Anatomists' Vade Mecum.

Chemistry.—Roscoe's Lessons in Elementary Chemistry; Balfour Stewart's Elements of Physics.

Materia Medica.—Royle and Headland's Manual of Materia Medica.

Physiology.—Carpenter's Manual.

Medicine.—Hooper's Physicians' Vade Mecum by Guy and Harley.

Surgery.—Druitt's Surgeons' Vade Mecum.

Midwifery.—Dr. Lloyd Roberts' Manual of Midwifery.

Ophthalmic Medicine and Surgery.—Macnamara's Diseases of the Eye.

Medical Jurisprudence.—Taylor's Manual of Medical Jurisprudence.

Botany.—First Book of Indian Botany, by Oliver.

Diseases of Women.—West's Diseases of Women.

Diseases of Children.—West's Lectures on the Diseases of Infancy and Childhood.

Hygiene.—Madras Manual of Hygiene by Dr. H. King.

Pathology.—Jones' and Sieveking's Manual of Pathological Anatomy.

Comparative Anatomy.—Jones' (T. Rymer) Manual of Comparative Anatomy.

Practical Anatomy.—Demonstrations of Anatomy by G. V. Ellis.

Practical Chemistry.—Jones' Junior Course of Practical Chemistry.

Practical Pharmacy.—Bidie's Practical Pharmacy.

Operative and Minor Surgery.—Fairlie Clarke's Manual of Surgery, and Bandages and Splints.

Clinical Medicine.—Bennett's Introduction to Clinical Medicine.

Microscope.—Beale's "How to work with the Microscope."

Extract from G. O. No. 99, dated 24th March 1869.

"It will be obligatory upon the pupils in the Senior and Second Departments to supply themselves with the latest editions of the prescribed text-books."

No. 22.

List of sanctioned Text-Books for the Junior Department.

SENIOR CLASS.

Fairlie Clarke's Surgery, with Supplement on Bandages and Splints.
Meadow's Manual of Midwifery.
Tanner's Index of Diseases.
Dr. King's Hygiene.

Digitized by Google

JUNIOR CLASS.

Wilson's Anatomy.
Milne's Manual of Materia Medica.
Willie's Essentials of Physiology.
Dr. Bidie's Practical Pharmacy.

No. 23.

The Principal of the Medical College notifies for public information that a Government Scholarship, tenable for five years, will be available from the 1st of October next.

Candidates for the scholarship must have passed the First Examination in Arts of the Madras, or of some other recognized University, and a preference will be given to the candidate who shall have taken up Latin as the optional language at the said F. A. Examination.

The successful candidate will receive a monthly stipend of Rupees Twenty, to be increased to Rupees Thirty on passing, successfully and at the regulated time, the Preliminary Scientific Examination of the University, and a further increase of Rupees Ten will be made when he shall have passed successfully and at the regulated time the First Examination of the University for Medical Degrees.

The stipend of the scholarship is subject to curtailment, suspension, or entire withdrawal should the Educational Authorities have occasion to find fault with the conduct, want of zeal, or lack of ability of the stipendiary student; and failure to pass the required examinations will entail forfeiture of all future increase of stipend.

No stipend can be held for more than five years.

Government scholarships are open to all, whether European, East Indian, or Native.

Candidates who have passed the First Examination in Arts are admitted as Private Students to the Senior Department of the College, and are gratuitously educated, provided they desire to qualify for Medical Degrees in the University of Madras.

Candidates for Government Scholarships, as well as Private Students who have not passed in Latin at the First Examination in Arts, are required to pass in that language up to the F.A. Standard at the Preliminary Scientific Examination held at the close of their first year of study.

Applications are to be addressed to the Principal of the Medical College on or before the 29th of August next.

MADRAS, MEDICAL COLLEGE,
31*st May* 1875.

M. C. FURNELL, F.R.C.S.,
Principal, Medical College.

N.B.-Candidates for scholarships should make themselves acquainted with the details of the University Rules for Degrees in Medicine.

Digitized by Google

No. 24.

Extract from the Medical College Regulations.

1. Every Student is required to attend punctually at the stated hours for Lectures and Dissections.

2. Immediately after the bell for the assembly of the Class-room has been rung, the Roll shall be called and the absence of any Student noted. A Student coming into the Class-room after Roll-call shall be punished by the loss of marks. Any misconduct shall subject a Student to such loss of position or of marks in his class as the offence may appear to the Professor to warrant. Should this punishment be deemed insufficient, a report will be made to the Principal.

3. Gross irregularity of any kind shall be brought to the notice of the Principal, and such penalty awarded as he may deem fit.

4. Any Student who shall absent himself without leave (unless such absence be satisfactorily explained), or in consequence of sickness, attributable to his own imprudence, shall be punished by the loss of marks.

5. Any Student who shall be prevented from attending his class in consequence of confinement to the Hospital or in the Congee-house, shall be considered as having been "absent without leave."

6. In case of absence on account of sickness duly certified, not the result of the Student's own imprudence, the absentee will be relieved from penalty.

7. To prevent irregularity of attendance on the part of Students, on the pretext of temporary ailment or of taking medicine, the following rules shall be strictly observed.

All Students of the Second and Junior Departments attached to the General Hospital or to H. M.'s Regimental Hospital when requiring medicine, and all Students of the same Departments present in College, when falling sick shall apply to the Apothecary of the General Hospital, and shall remain in the Hospital for the rest of the day. If reporting sick after midday, they will be detained in Hospital till the Medical Officer's visit next morning. The usual certificate of absence must be produced.

Such Students when indisposed for more than one day are to be admitted to the General Hospital as in-patients, and on discharge will present to the College authorities the usual certificate.

Students of the abovenamed Departments doing duty at other Hospitals and Dispensaries shall remain on the premises when taking medicine, and shall be transferred to the General Hospital as patients; if the duration of the illness exceeds one day, the usual certificate must be produced.

Senior Department Students when attacked with illness are to report the same in writing to the Principal, and are to produce a

Digitized by Google

certificate from some competent Medical authority, covering the whole time during which they have been absent from College and Hospital.

8. Any Student absenting himself for the purpose of attending the Police Office shall be subject to the same penalty as if absent without leave, unless he can produce a certificate, for the information of the Principal, that his attendance has been necessary either as witness, or, if as a defendant, that he has been acquitted by the Magistrate of the charge preferred against him. Absence on account of attendance at the Small Cause Court will be regulated by the same principle.

9. Leave of absence during the vacation of the College shall be granted to such Students alone as have paid satisfactory attention to their studies during the previous course, and to those whose conduct has been in all other respects satisfactory.

10. Every Student, to whom books or other property of Government are entrusted, will be held responsible for their preservation in good condition, and, in the event of their being lost or damaged, will be required to replace them or defray their cost.

11. No Student shall receive his Certificate of Qualification until he has paid all expenses incurred on account of the purchase of Text Books, and has satisfied all demands against him arising out of the preceding rule.

Scale of Punishment.

1*st*.—Confinement to Hospital ...	15 days, taking all duties.
2*nd*.—Confinement in Defaulter, or any convenient room set apart for the purpose.	7 days, taking all duties.
3*rd*.—Confinement in Congee-house or any convenient room. For Europeans, bread and water diet; for Natives, rice congee with salt.	7 days, taking no duties.
4*th*.—Confinement in Solitary Cell, or place as nearly like as may be available. For Europeans, bread and water diet; for Natives, rice congee with salt.	7 days, taking no duties.

Holidays.

Saturday ...	Do.	...	...	...	...	...	...	...

The Winter course commences on the 1st of October and terminates on the 31st of March; the Summer course commences on the 1st of April and terminates on the 30th of June.

The proportion of Examinations to Lectures shall not fall below one in three in the several courses, whether these courses be delivered during Winter or Summer Sessions. Towards the close of each course of Lectures there shall be held a "Conversational Course," which shall include Examinations in all the subjects lectured upon.

Recorded Examinations of all the Junior Students shall be made by Committees of Professors at the end of every Session. These are not to exempt the Students from such Examinations in Chemistry and Materia Medica as the Final Examination Committee may consider necessary to elicit the Student's knowledge of the application of these sciences to practice, or to satisfy it that he has not neglected these studies during the interval.
